

The number “e” error listing 5 through 10,000

This is a listing for each digit calculation from 5 through to 10,000 digits that shows how many units error in the last digit and with how many of the last digits are in error. All of the values with the last 7 digits in error are as follows: 1575, 2367, 2924, 3859, 5006, 7143, 7693, 8108, 8651, 8705, 8756, 8865, 9106 and 10019. The only one with 8 digits error is found at 7694. See the last page for the value of “e” to 10,100 digits that I used in my program. In the first million digits of “e” there is a spot with 6 “0's” and another with 8 “9's” each of these places would create a large number of last digits in error. All you would have to do is check a few places around for each group of 0's or 9's to find the bad spots. See the numbers around 7694 to see what I am talking about. Have fun with this table and good luck if you want to write your own program and expand beyond this point.

For most people who do programming and use the extended math package like the one called “GNU Multiple Precision Arithmetic Library” or others which is available with many different programming languages you cannot do the correct decimal calculation with the digits in error, try it and check your results with mine? The problem with the GNU is that it is binary and not decimal like humans use and the calculation extends beyond the required accuracy, you can not set it to say 98 digits you can print a set number of digits from more. For your information I have calculated PI to 100 digits by hand it took 108 pages and that result agreed with the results of my PI program which has the same core program as my “e” program. A good example of the problem can be seen at the web site “mathforum.org/dr.math/faq/faq.e.html. Note when doing hand calculation you do not round up the value as they did in the example 13 times. You just simply truncate the answer as this works to your advantage, if you want to expand your calculation in the future you do not reinvent the wheel and start all over. In the above mentioned example they did a 25 digit calculation and ended up with an answer one unit above than it should be and said it was correct. There were 13 terms that were rounded up by one unit and the extra unit also came in the last calculation which placed the total over the correct value. Their value was "2.7182818284590452353602875" and should have been one unit less at "2.7182818284590452353602874"; by the way the 26th digit is a 7 which would cause a round up only if you know the extra digit. Because the answers were round up by one unit they must have had extra digits beyond the 25 digits before the term was printed which is very common when doing extended math calculation. In the last division they had a value of 16 and it needed to be divide by 25 which should have been a 0 for 25 digits and not the incorrect answer of 1, yes if you do extra digits which allows you to do auto round up the answer would become a 1. The same effect was in the 22 digit answer which was their goal for doing the calculation; it ended up being rounded up by 1 unit in the last digit too. This is what I am talking about in a hand calculation you do not have the next digit to work with so you cannot round up and should never do. If you create a program it needs to have the same results as a hand calculation would do. The following listing is the values they should have produced the +1 at the end of the 13 lines is where the round up should have not occurred. As a justification of my statements, when William Shanks published his 707 digits of his 709 digits calculated value of PI the last two digits that were dropped was 92 and he did not use them to round up. For his 609 digits he also dropped the last two digits which were only 08 which had no effect. In his book he listed all the

terms for his 530 digit calculation of PI and he also did not round up the terms. I can think of two methods that may just work correctly if some one with extended math package would like to try it.

I did the following hand calculation for 25 digits in 3 hours; it took seven pages for the total calculation. I have placed the scanned pages on my web site for your viewing at “engert.us/erwin/miscellaneous/Hand calculation number e.pdf”. In a similar location my 20, 40 and 100 hand digits calculation of PI can be found at the more general location “engert.us/erwin/miscellaneous.html”

 \end{aligned}$$

$$e = 2.71828\ 18284\ 59045\ 23536\ 02862$$

This is the correct sum that they should have produced if they were doing the work correctly and matched these 25 digits with the 12 unit error in the last digit.

- e with 5 digits, 8 terms, 4 its error, with last 1 digits in error, last digits are 271824 should be 271828.
- e with 6 digits, 9 terms, 4 units error, with last 2 digits in error, last digits are 18277 should be 18281.
- e with 7 digits, 10 terms, 4 units error, with last 1 digits in error, last digits are 27182814 should be 27182818.
- e with 8 digits, 11 terms, 4 units error, with last 2 digits in error, last digits are 1828178 should be 1828182.
- e with 9 digits, 12 terms, 5 units error, with last 1 digits in error, last digits are 8281823 should be 8281828.

e with 10 digits, 13 terms, 7 units error, with last 2 digits in error, last digits are 2818277 should be 2818284.
e with 11 digits, 14 terms, 5 units error, with last 1 digits in error, last digits are 8182840 should be 8182845.
e with 12 digits, 14 terms, 7 units error, with last 1 digits in error, last digits are 1828452 should be 1828459.
e with 13 digits, 15 terms, 7 units error, with last 2 digits in error, last digits are 8284583 should be 8284590.
e with 14 digits, 16 terms, 6 units error, with last 3 digits in error, last digits are 2845898 should be 2845904.
e with 15 digits, 17 terms, 9 units error, with last 2 digits in error, last digits are 8459036 should be 8459045.
e with 16 digits, 18 terms, 10 units error, with last 2 digits in error, last digits are 4590442 should be 4590452.
e with 17 digits, 18 terms, 11 units error, with last 2 digits in error, last digits are 5904512 should be 5904523.
e with 18 digits, 19 terms, 9 units error, with last 2 digits in error, last digits are 9045226 should be 9045235.
e with 19 digits, 20 terms, 10 units error, with last 2 digits in error, last digits are 452343 should be 452353.
e with 20 digits, 21 terms, 10 units error, with last 2 digits in error, last digits are 4523526 should be 4523536.
e with 21 digits, 21 terms, 10 units error, with last 2 digits in error, last digits are 5235350 should be 5235360.
e with 22 digits, 22 terms, 10 units error, with last 3 digits in error, last digits are 2353592 should be 2353602.
e with 23 digits, 23 terms, 13 units error, with last 2 digits in error, last digits are 3536015 should be 3536028.
e with 24 digits, 24 terms, 13 units error, with last 2 digits in error, last digits are 5360274 should be 5360287.
e with 25 digits, 24 terms, 12 units error, with last 2 digits in error, last digits are 3602862 should be 3602874.
e with 26 digits, 25 terms, 11 units error, with last 2 digits in error, last digits are 6028736 should be 6028747.
e with 27 digits, 26 terms, 14 units error, with last 2 digits in error, last digits are 287457 should be 287471.
e with 28 digits, 26 terms, 13 units error, with last 2 digits in error, last digits are 2874700 should be 2874713.
e with 29 digits, 27 terms, 12 units error, with last 2 digits in error, last digits are 8747123 should be 8747135.
e with 30 digits, 28 terms, 13 units error, with last 2 digits in error, last digits are 7471339 should be 7471352.
e with 31 digits, 29 terms, 12 units error, with last 2 digits in error, last digits are 4713514 should be 4713526.
e with 32 digits, 29 terms, 13 units error, with last 2 digits in error, last digits are 7135253 should be 7135266.
e with 33 digits, 30 terms, 13 units error, with last 2 digits in error, last digits are 1352649 should be 1352662.
e with 34 digits, 31 terms, 18 units error, with last 2 digits in error, last digits are 3526606 should be 3526624.
e with 35 digits, 31 terms, 17 units error, with last 2 digits in error, last digits are 5266232 should be 5266249.
e with 36 digits, 32 terms, 16 units error, with last 2 digits in error, last digits are 2662481 should be 2662497.
e with 37 digits, 33 terms, 13 units error, with last 2 digits in error, last digits are 6624964 should be 6624977.
e with 38 digits, 33 terms, 16 units error, with last 2 digits in error, last digits are 6249759 should be 6249775.
e with 39 digits, 34 terms, 19 units error, with last 2 digits in error, last digits are 2497738 should be 2497757.
e with 40 digits, 34 terms, 20 units error, with last 2 digits in error, last digits are 4977552 should be 4977572.
e with 41 digits, 35 terms, 19 units error, with last 2 digits in error, last digits are 9775705 should be 9775724.
e with 42 digits, 36 terms, 16 units error, with last 2 digits in error, last digits are 7757231 should be 7757247.
e with 43 digits, 36 terms, 17 units error, with last 2 digits in error, last digits are 7572453 should be 7572470.
e with 44 digits, 37 terms, 18 units error, with last 3 digits in error, last digits are 5724691 should be 5724709.
e with 45 digits, 38 terms, 19 units error, with last 2 digits in error, last digits are 7247074 should be 7247093.
e with 46 digits, 38 terms, 17 units error, with last 2 digits in error, last digits are 2470919 should be 2470936.
e with 47 digits, 39 terms, 17 units error, with last 2 digits in error, last digits are 4709352 should be 4709369.
e with 48 digits, 40 terms, 16 units error, with last 2 digits in error, last digits are 7093683 should be 7093699.
e with 49 digits, 40 terms, 15 units error, with last 2 digits in error, last digits are 936984 should be 936999.
e with 50 digits, 41 terms, 17 units error, with last 2 digits in error, last digits are 9369978 should be 9369995.
e with 51 digits, 41 terms, 19 units error, with last 2 digits in error, last digits are 3699940 should be 3699959.
e with 52 digits, 42 terms, 21 units error, with last 2 digits in error, last digits are 6999574 should be 6999595.
e with 53 digits, 43 terms, 21 units error, with last 2 digits in error, last digits are 9995936 should be 9995957.
e with 54 digits, 43 terms, 20 units error, with last 2 digits in error, last digits are 9959554 should be 9959574.
e with 55 digits, 44 terms, 20 units error, with last 2 digits in error, last digits are 9595729 should be 9595749.
e with 56 digits, 44 terms, 21 units error, with last 2 digits in error, last digits are 5957475 should be 5957496.
e with 57 digits, 45 terms, 22 units error, with last 2 digits in error, last digits are 9574944 should be 9574966.
e with 58 digits, 46 terms, 23 units error, with last 2 digits in error, last digits are 5749646 should be 5749669.
e with 59 digits, 46 terms, 23 units error, with last 2 digits in error, last digits are 7496673 should be 7496696.
e with 60 digits, 47 terms, 24 units error, with last 2 digits in error, last digits are 4966943 should be 4966967.
e with 61 digits, 47 terms, 24 units error, with last 2 digits in error, last digits are 9669652 should be 9669676.
e with 62 digits, 48 terms, 22 units error, with last 2 digits in error, last digits are 6696740 should be 6696762.
e with 63 digits, 49 terms, 26 units error, with last 2 digits in error, last digits are 6967601 should be 6967627.
e with 64 digits, 49 terms, 23 units error, with last 2 digits in error, last digits are 9676254 should be 9676277.
e with 65 digits, 50 terms, 25 units error, with last 2 digits in error, last digits are 6762747 should be 6762772.
e with 66 digits, 50 terms, 25 units error, with last 3 digits in error, last digits are 7627699 should be 7627724.
e with 67 digits, 51 terms, 20 units error, with last 2 digits in error, last digits are 6277220 should be 6277240.
e with 68 digits, 52 terms, 21 units error, with last 3 digits in error, last digits are 2772386 should be 2772407.
e with 69 digits, 52 terms, 26 units error, with last 2 digits in error, last digits are 7724050 should be 7724076.
e with 70 digits, 53 terms, 27 units error, with last 2 digits in error, last digits are 7240739 should be 7240766.
e with 71 digits, 53 terms, 31 units error, with last 2 digits in error, last digits are 2407632 should be 2407663.

e with 72 digits, 54 terms, 29 units error, with last 2 digits in error, last digits are 4076601 should be 4076630.
e with 73 digits, 54 terms, 26 units error, with last 3 digits in error, last digits are 766277 should be 766303.
e with 74 digits, 55 terms, 29 units error, with last 2 digits in error, last digits are 7663006 should be 7663035.
e with 75 digits, 56 terms, 28 units error, with last 2 digits in error, last digits are 6630325 should be 6630353.
e with 76 digits, 56 terms, 27 units error, with last 2 digits in error, last digits are 6303508 should be 6303535.
e with 77 digits, 57 terms, 26 units error, with last 2 digits in error, last digits are 3035328 should be 3035354.
e with 78 digits, 57 terms, 29 units error, with last 2 digits in error, last digits are 353518 should be 353547.
e with 79 digits, 58 terms, 26 units error, with last 2 digits in error, last digits are 3535449 should be 3535475.
e with 80 digits, 58 terms, 30 units error, with last 2 digits in error, last digits are 5354729 should be 5354759.
e with 81 digits, 59 terms, 29 units error, with last 2 digits in error, last digits are 3547565 should be 3547594.
e with 82 digits, 60 terms, 30 units error, with last 2 digits in error, last digits are 5475915 should be 5475945.

e with 9957 digits, 3463 terms, 1632 units error, with last 4 digits in error, last digits are 557102344 should be 557103976 .
e with 9958 digits, 3463 terms, 1604 units error, with last 4 digits in error, last digits are 571038161 should be 571039765 .
e with 9959 digits, 3463 terms, 1618 units error, with last 4 digits in error, last digits are 710396034 should be 710397652 .
e with 9960 digits, 3464 terms, 1627 units error, with last 4 digits in error, last digits are 103974894 should be 103976521 .
e with 9961 digits, 3464 terms, 1610 units error, with last 4 digits in error, last digits are 39763604 should be 39765214 .
e with 9962 digits, 3464 terms, 1585 units error, with last 4 digits in error, last digits are 397650561 should be 397652146 .
e with 9963 digits, 3465 terms, 1625 units error, with last 5 digits in error, last digits are 976519844 should be 976521469 .
e with 9964 digits, 3465 terms, 1605 units error, with last 4 digits in error, last digits are 765213091 should be 765214696 .
e with 9965 digits, 3465 terms, 1645 units error, with last 4 digits in error, last digits are 652145315 should be 652146960 .
e with 9966 digits, 3466 terms, 1611 units error, with last 4 digits in error, last digits are 521467991 should be 521469602 .
e with 9967 digits, 3466 terms, 1598 units error, with last 4 digits in error, last digits are 214694429 should be 214696027 .
e with 9968 digits, 3466 terms, 1596 units error, with last 5 digits in error, last digits are 146958680 should be 146960276 .
e with 9969 digits, 3467 terms, 1585 units error, with last 4 digits in error, last digits are 469601181 should be 469602766 .
e with 9970 digits, 3467 terms, 1632 units error, with last 4 digits in error, last digits are 696026030 should be 696027662 .
e with 9971 digits, 3467 terms, 1632 units error, with last 4 digits in error, last digits are 960274993 should be 960276625 .
e with 9972 digits, 3468 terms, 1606 units error, with last 4 digits in error, last digits are 602764652 should be 602766258 .
e with 9973 digits, 3468 terms, 1643 units error, with last 4 digits in error, last digits are 27660940 should be 27662583 .
e with 9974 digits, 3468 terms, 1647 units error, with last 4 digits in error, last digits are 276624188 should be 276625835 .
e with 9975 digits, 3469 terms, 1609 units error, with last 4 digits in error, last digits are 766256750 should be 766258359 .
e with 9976 digits, 3469 terms, 1606 units error, with last 4 digits in error, last digits are 662581993 should be 662583599 .
e with 9977 digits, 3469 terms, 1639 units error, with last 4 digits in error, last digits are 625834351 should be 625835990 .
e with 9978 digits, 3470 terms, 1647 units error, with last 4 digits in error, last digits are 258358258 should be 258359905 .
e with 9979 digits, 3470 terms, 1605 units error, with last 4 digits in error, last digits are 583597446 should be 583599051 .
e with 9980 digits, 3470 terms, 1609 units error, with last 5 digits in error, last digits are 835988910 should be 835990519 .
e with 9981 digits, 3471 terms, 1636 units error, with last 4 digits in error, last digits are 359903562 should be 359905198 .
e with 9982 digits, 3471 terms, 1620 units error, with last 4 digits in error, last digits are 599050367 should be 599051987 .
e with 9983 digits, 3471 terms, 1611 units error, with last 4 digits in error, last digits are 990518259 should be 990519870 .
e with 9984 digits, 3472 terms, 1607 units error, with last 4 digits in error, last digits are 905197097 should be 905198704 .
e with 9985 digits, 3472 terms, 1616 units error, with last 4 digits in error, last digits are 51985426 should be 51987042 .
e with 9986 digits, 3472 terms, 1668 units error, with last 5 digits in error, last digits are 519868755 should be 519870423 .
e with 9987 digits, 3473 terms, 1615 units error, with last 4 digits in error, last digits are 198702615 should be 198704230 .
e with 9988 digits, 3473 terms, 1605 units error, with last 4 digits in error, last digits are 987040695 should be 987042300 .
e with 9989 digits, 3473 terms, 1613 units error, with last 4 digits in error, last digits are 870421388 should be 870423001 .
e with 9990 digits, 3474 terms, 1628 units error, with last 5 digits in error, last digits are 704228389 should be 704230017 .
e with 9991 digits, 3474 terms, 1663 units error, with last 6 digits in error, last digits are 42298516 should be 42300179 .

e with 9992 digits, 3474 terms, 1625 units error, with last 4 digits in error, last digits are 423000169 should be 423001794 .
 e with 9993 digits, 3475 terms, 1620 units error, with last 4 digits in error, last digits are 230016326 should be 230017946 .
 e with 9994 digits, 3475 terms, 1603 units error, with last 4 digits in error, last digits are 300177862 should be 300179465 .
 e with 9995 digits, 3475 terms, 1630 units error, with last 4 digits in error, last digits are 1793025 should be 1794655 .
 e with 9996 digits, 3476 terms, 1614 units error, with last 4 digits in error, last digits are 17944939 should be 17946553 .
 e with 9997 digits, 3476 terms, 1623 units error, with last 4 digits in error, last digits are 179463913 should be 179465536 .
 e with 9998 digits, 3476 terms, 1606 units error, with last 4 digits in error, last digits are 794653761 should be 794655367 .
 e with 9999 digits, 3477 terms, 1625 units error, with last 4 digits in error, last digits are 946552053 should be 946553678 .
 e with 10000 digits, 3477 terms, 1649 units error, with last 4 digits in error, last digits are 465535139 should be 465536788 .

The number “e” to 10,100 digits, this was the value I reduced from the 10,120 the extra 20 digits is more than enough to make the this value correct and then I only used the first 10,000 digits and left the extra 100 never used. I calculated and used this value in my program to figure out how many digits error.

The dropped 20 digits are as follows “28032 32746 03922 18054” the correct value is “28032 32746 03922 19687” as you can see the last four digits are in error with 1633 units error in the last digit this is very much in line with the value at the end of my table above. As you can see dropping 20 digits was way over kill but I was playing it on the safe side.
